INDIANA DEPARTMENT OF CONSERVATION
HARLEY G. HOOK, DIRECTOR

GUIDE TO INDIANA LAKES

Published 1955, by the Indiana Department of Conservation

HARLEY G. HOOK, DIRECTOR

GEORGE N. CRAIG, GOVERNOR

Compiled and Edited by Barbara Bechtol

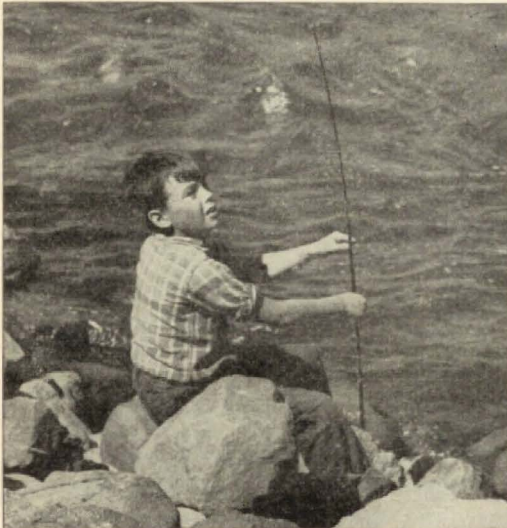

Preface

The Indiana Department of Conservation works, through all of its various divisions and agencies, to conserve for the pleasure and benefit of the greatest possible number of people of the State of Indiana the natural and scenic resources of that state: its minerals, its wildlife and fish, its historic sites and landmarks, its forests and plant life, and such natural and scenic areas as are most typical of the various regions of the state and can best be developed in such a way as to provide public outdoor recreation without impairing those elements which create the beauty of these areas.

The Indiana Department of Conservation consists of a bipartisan panel of four members appointed by the Governor to serve at his pleasure for four year terms. The Director of the Department serves as the executive officer of the Department and is charged with implementing and enforcing those regulations and policies formulated by the Department.

Funds for the operation of the Indiana Department of Conservation are derived from several sources which vary with the nature of the functions of the various divisions.

It is the aim of the Department to serve the best interests of every citizen of Indiana by preserving and putting to the best possible use that vast store of natural resource and raw material with which this state has been so abundantly endowed and which has played so vital a role in the unfolding and development of its history.

Indiana's many fishing areas appeal to all people of all ages.

Service to the public and faithful protection of the trust vested in the officials and employees of the Department by the public have been and will continue to be the cardinal principles guiding the operations and policies of the Indiana Department of Conservation.

This Conservation Department works constantly to protect the diversified resources of the state. It is the belief of the Department that use, enjoyment, protection, and conservation guarantee our heritage for future generations.

Fish and Game Division

Through its Division of Fish and Game, the Indiana Department of Conservation carries on its program of preserving the state's fish and wildlife resources. This division is charged with carrying out and enforcing the policies of the Department and all legislative enactments regarding fish and game.

The division's principle functions are the sale of licenses and permits; operation of fish hatcheries and game farms and refuges; production, distribution, and stocking of fish and game; game management, including leasing of small wildlife habitat areas and distribution of multiflora rose seedlings; and co-operation with the United States Fish and Wildlife Service.

More than 21,500 acres are owned or leased by the division as fish hatcheries and game preserves, as well as for public fishing sites. The division's properties are found in every section of the state.

The 11 state fish hatcheries include 150 ponds and cover approximately 102 acres. These ponds produce largemouth bass, smallmouth bass, redear sunfish, rock bass, and channel catfish, which are released, as fingerlings, into Indiana's lakes and streams. Trout are imported and are also released in northern Indiana waters.

About 8240 acres are included in the three game farms operated by the division. These farms include wildlife preserves, areas for the protection of migratory birds, and breeding areas for pheasants, quail, and other small game.

The division also leases more than 16,600 acres from private landowners for use as wildlife habitat and refuge areas.

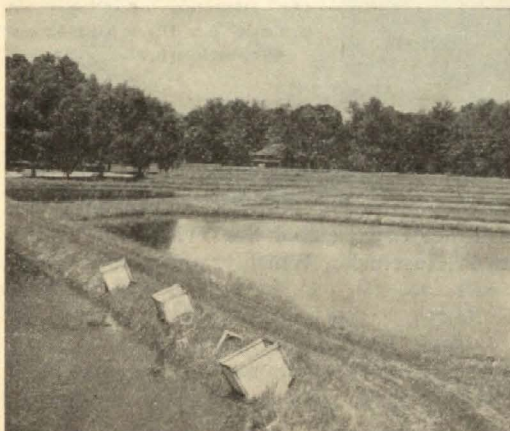

Display trucks owned by the Division of Fish and Game and exhibited throughout the state.

To provide recreation opportunities for the people of the state, the division maintains two public hunting and fishing areas, one at Willow Slough, containing approximately 8000 acres, and one at Hovey Lake, containing about 900 acres. Another area, called the Tri-County Game Preserve, is under development in Kosciusko, Whitley, and Noble Counties.

STATE PROPERTIES OPERATED BY THE DIVISION OF FISH AND GAME

Name of Property	County	Acreage
Beaver Lake Prairie Chicken Refuge.....	Newton	640.00
Hovey Lake State Game Preserve.....	Posey	885.00
Jasper-Pulaski State Game Preserve.....	Jasper & Pulaski	7198.61
Kankakee State Game Preserve.....	Starke & Laporte	2302.11
Muscatatuck State Park & Game Farm.....	Jennings	200.00
Tri-County State Game Preserve.....	Kosciusko, Noble, Whitley	1197.08
Wells County State Game Preserve.....	Wells	971.36
Willow Slough State Game Preserve.....	Newton	7916.17
Avoca State Fish Hatchery.....	Lawrence	43.06
Bass Lake State Fish Hatchery.....	Starke	14.10
Driftwood State Fish Hatchery.....	Jackson	— on Forestry property

Federal Aid Program

The Pittman-Robertson and Dingell-Johnson programs are carried on co-operatively by the state and federal governments for the purpose of restoring and conserving populations of game animals and fish, respectively.

Federal funds for the Pittman-Robertson Aid to Wildlife Restoration program are collected from an 11% excise tax on the sale of firearms and ammunition. This money is then allocated to the states, one-half by the ratio which the area of a particular state bears to the total area of the United States, and one-half by the ratio which the number of paid hunting licenses sold by a state bears to the total number sold in the United States. These funds, when returned to a state, are used for wildlife restoration projects, such as land acquisition, wildlife development, investigations, and maintenance.

Federal money is appropriated to the states on a 75%-25% basis, that is, with the understanding that the state will match each three dollars contributed by the Federal government with one dollar of its own funds.

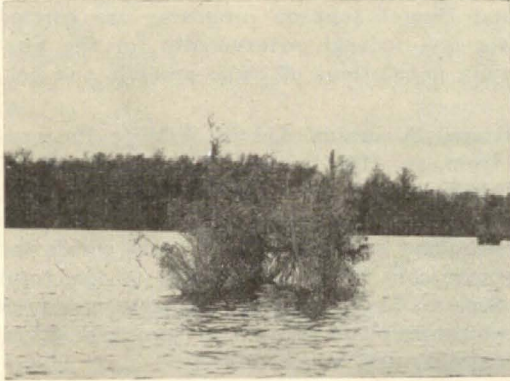

Funds for the Dingell-Johnson Federal Aid to Fish Restoration program are derived from a 10% excise tax on the sale of certain sports fishing equipment. These funds are distributed to the state 40% in the ratio which the total area of the state, including coastal and Great Lakes waters, bears to the total area of the United States, and 60% by the ratio which the number of paid fishing licenses sold by a state bears to the total number sold in the United States.

These funds, also, are matched by the states on a three-to-one basis, and are used in much the same way that Wildlife Restoration funds are used, in projects bearing on the conservation of fish.

Lake Access Areas

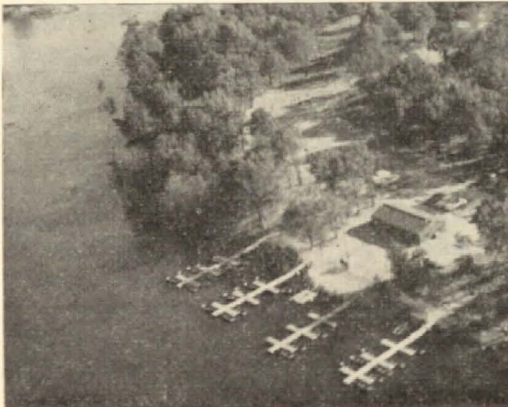

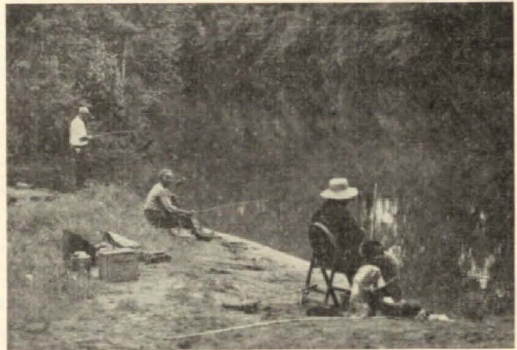

Through the use of funds allocated to the Dingell-Johnson Federal Aid to Fish Restoration Program, the state has been, since 1952, acquiring tracts of land to be developed as public fishing sites on the lakes of Indiana, as well as on certain streams where such areas were needed.

During the period from June 1, 1952, to June 1, 1954, the state acquired or placed under option the following tracts which will give access to over 7,000 acres of public fishing waters.

Duck blind at Hovey Lake State Game Preserve, public recreation area maintained in Posey County by the Division of Fish and Game.

A typical fishing scene at another of Indiana's many fishing areas.

Aerial view of the boat landing at Willow Slough, another public recreation area maintained by the Division of Fish and Game.

PUBLIC ACCESS AREAS

Name of Lake	County	Water Area Made Available	Location of Site
*Chapman Lake	Kosciusko	226 acres	South shore of Big Chapman
*Grassy Creek	Kosciusko	1279 acres (Tippecanoe & Barbee Lakes)	Leesburg-Oswego Road
*Westler Lake	LaGrange	652 acres	Near channel between Westler & Witmer
Cree Lake	Noble	54 acres	West side of lake on S. R. No. 3
*Pretty Lake	LaGrange	185 acres	West side of lake
*Adams Lake	LaGrange	267 acres	East side of lake
*Palestine Lake	Kosciusko	400 acres	S. R. No. 25 in Palestine, Ind.
Fish Lake	LaGrange	145 acres	Plato-Wolcottville Road
*Otter Lake	Steuben	114 acres	U. S. No. 20, 7 mi. east of Angola
Emma Lake	LaGrange	38 acres	Emma-Topeka Road
*Maxinkuckee	Marshall	1650 acres	South shore on S. R. No. 17
*Lake Manitou	Fulton	631 acres	East shore of lake
Lime Lake	Steuben	376 acres	On channel between Lime & Gage Lakes
*Knapp Lake	Noble	82 acres	On north shore of lake
Balls Lake	Steuben	78 acres	West end of lake, at inlet
Big Turkey Lake	Steuben	424 acres	On west shore
Simonton Lake	Elkhart	245 acres	South shore, on channel
Fish Lake	Elkhart	20 acres	North shore, along road
Carr's Lake	Kosciusko	64 acres	West shore at north end of lake
*Sylvan Lake	Noble	575 acres	At Rome City, adjoining dam
Lake of the Woods	Marshall	414 acres	West shore of lake

* These areas have been developed and are ready for public use.

Water Conservation

The Division of Water Resources of the Indiana Department of Conservation works co-operatively with the United States Geological Survey to appraise Indiana's present and potential water resources. The Division then studies data collected under this program, points out instances of waste, and recommends necessary conservation measures.

Since lakes are one of Indiana's most valuable resources, the state takes steps to preserve them. As part of its program, lake gages are installed and average water levels are established, any critical decrease is noted; and proper recommendations for raising and maintaining the average water level are made.

Within historic time, the levels of Indiana's lakes have altered decidedly. Changes in lake levels are sometimes noticeable only over a long period of time, and sometimes may be seen yearly. There is always a seasonal change.

Lakes are destroyed by filling with sediment and muck, and by draining through dredging of outlets. Some natural lakes have been destroyed by one or a combination of these methods, and most have been reduced in area. Sedimentation and formation of muck deposits can be retarded by sound conservation practices. Waste of lake water by lowering of outlet streams is a result of unwise drainage in many cases, and may eventually cause the destruction of many natural lakes.

Carrying in of debris or foreign matter by streams and springs, replacement of water area by muck formed by the decay of aquatic vegetation, deforestation, and cultivation of land and too close grazing tend to affect lake levels and reduce the areas of lakes.

The glacial lakes in northern Indiana have changed much since the time of their formation, when the northern parts of what are now Lake and Porter Counties were covered with water. More beds of extinct glacial lakes are now found in Indiana than existing ones. Deposits of peat, muck, and marl near the lakes point out this change. Lake basins have disappeared after filling by transported material, encroachment of vegetation upon open water, and decrease of water supply.

Lake levels fluctuate with the seasons: in rainy weather, they may rise too high for farmers whose land drains into them, and in dry seasons a level may be reached which is injurious to fish life and unsatisfactory to cottage owners. Properly operated controls are the best solution for both interests.

Hundreds of artificial lakes, which help to save water, are now in existence in Indiana, and more are being constructed each year. Suitable locations are numerous throughout the state.

* * *

Water is undoubtedly Indiana's most valuable and important mineral resource. The entire agricultural, industrial, and economic welfare of the state is dependent upon its wise use and careful conservation. Since it has been so abundant in the past, there is a tendency to believe that our supply is unlimited. There is, however, no such thing as an inexhaustible source of fresh water.

It is the hope of the Department that the aid of every citizen can be enlisted in the preservation of this vital resource.

General Information on State Parks

In order to conserve for public recreational use outstanding examples of Indiana's natural and cultural resources, the Indiana Department of Conservation administers, through the Division of State Parks, Lands and Waters, sixteen state parks and two state beaches.

These areas are so planned and so situated that at least one of them is within the easy reach of nearly every citizen of the state. Land for the parks was acquired by the state with a view to preserving areas of scenic, scientific, historical, and archeological significance to Indiana for the enjoyment of its citizens.

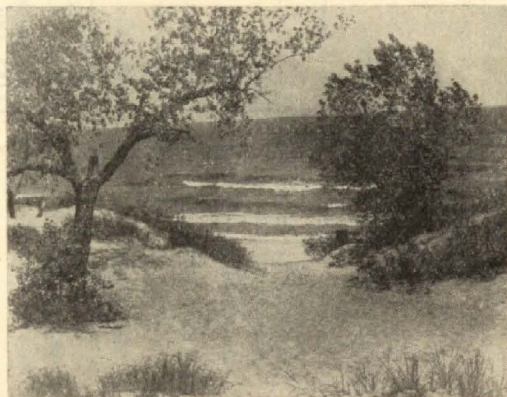

Indiana's state parks and historic monuments cover a total of 47,388 acres, and are open to the public throughout the year. Facilities for such activities as hiking, swimming, picnicking, skiing, horseback riding, camping, boating, and fishing are provided.

In order to encourage use of the state parks by family groups, a free bed rate for children under fourteen prevails at state park inns and inn-operated cabins. When accompanied by both parents, and sleeping in the same room with them, children under fourteen are charged only for food at the prevailing rate at the American plan hotels. If two or more children are accompanied by one parent, the full adult rate is charged for one, while the others are charged only for food. If children sleep in separate rooms from their parents, the full adult rate is charged. Cots, bunk beds, and folding beds are available for extra sleeping accommodations.

Modern supervised camping and trailer camp areas are furnished in many of the state parks. Modern sanitary facilities, including showers and laundries, are provided for these areas, as well as shelter houses, pure drinking water, tables, and benches. Free picnic areas have the above facilities as well as open fireplaces, outdoor ovens, and firewood when it is available. Although there is no charge for the use of the picnic areas, fifty cents per day is charged for each tent or trailer, plus twenty-five cents per day for electricity. Reservations for camp sites should be made with the park superintendent when groups include ten or more persons.

Anyone planning outdoor recreation, whether for an afternoon or for a more extended period of time will be able to find inexpensive facilities for his pleasure in Indiana's state parks.

Scene at Dunes Beach, Indiana Dunes State Park, in Porter County. This park consistently attracts the largest number of visitors.

HUNTING AND FISHING REGULATIONS

Laws passed by the 1955 General Assembly governing hunting and fishing are included in this summary.

* * *

For the purpose of enforcing the following regulations, the term "resident" means any person who has actually lived in Indiana, and still lives there, for six months immediately prior to his application for any license to hunt or fish.

* * *

FISHING REGULATIONS

Licenses

- A. Only the following may fish without a license:
 - 1. Children under 18.
 - 2. Owners and tenants of Indiana farm lands and their wives and children living with them, while fishing in waters on their own lands or lands on which they are tenants.
- B. All others who fish in Indiana must have licenses on their persons while they are fishing.
- C. Non-resident licenses.
 - 1. Persons who are not residents of Indiana and who plan to fish within the state must purchase a non-resident fishing license.
 - 2. Non-resident license holders may transport or carry out of the state at one time 2 days' legal catch of any particular fish. Two shipments are allowed per week. For example, since the legal limit on bluegills is 25, no more than 50 bluegills can be shipped or carried out of the state at one time.
- D. Fishing licenses may be revoked for violation of Indiana fishing laws.

Fishing methods and practices

- A. In general, the only means by which fish may be legally caught or killed is by angling with hook and line, except under certain specified conditions. This includes still fishing, fly casting, and bait casting. Any other method is illegal.
 - 1. Hook and line may not be attached to any floating device except a cork or bobber attached to an attended pole and line.
 - 2. A gaff or landing net may be used to secure a fish hooked on a lawful hook and line.
 - 3. A hand line or pole with a treble hook, not artificial bait, containing more than 2 single hooks may not be used.
 - 4. No more than 3 poles or hand lines may be used by one person at one time.
 - 5. Fishing appliances and apparatus may be seized and confiscated when they are used in violation of the fishing laws.
- B. It is illegal for anyone to possess any kind of fishing net, or any fish trap, except when fishing in Lake Michigan or in the Wabash River from Lafayette to the southern end of the boundary between Indiana and Illinois. These nets must be licensed and tagged by the Indiana Department of Conservation.

1. Minnow nets may be used under the regulations prescribed for minnow fishing.
2. Smelt nets may be used as the law provides.

Minnow fishing

- A. Regulations concerning equipment.
 1. Minnow seines
 - a. No minnow seine may be used which is more than 12 feet long and 4 feet deep.
 - b. No minnow seine with a mesh larger than $\frac{1}{4}$ inch may be used.
 2. Dip-nets
 - a. Dip-nets used for minnow fishing must not be more than 3 feet square.
 - b. No dip-net which has sides or walls may be used for minnow fishing.
 - c. The mesh in dip-nets used for minnow fishing must not be larger than $\frac{1}{4}$ inch.
 3. Minnow traps must not be longer than 24 inches.
- B. The season for taking minnows is closed from May 1st to June 12th, both dates inclusive.
- C. No more than 100 minnows may be transported across the state line at one time.
- D. No minnows may be sold in Indiana without a special license.

Smelt fishing

- A. It is lawful to use a smelt net to take smelt from Lake Michigan under a special license from the Indiana Department of Conservation. No smelt caught under this license may be sold in Indiana.
- B. Nets.
 1. Nets used for taking smelt must be tagged by the Indiana Department of Conservation.
 2. Size of nets
 - a. No smelt net may be longer than 12 feet.
 - b. No smelt net may be more than 6 feet deep.
 - c. No net shall be used which has a mesh larger than $\frac{5}{8}$ inch measured from knot to knot.
 3. It is unlawful to possess more than one smelt net at any time.
 4. Smelt nets may be used only in March, April, and May.

Trot lines

- A. Any trot line which is used in Indiana must conform to the following specifications:
 1. No trot line may have more than 50 hooks.
 2. Hooks must be at least $\frac{1}{2}$ inch from point to shank or larger.
- B. Bait
 1. Trot lines may not be baited with minnows, fish, or crayfish.
 2. Bait on a trot line must be sunk to a depth of at least 5 feet.
- C. Trot lines may be used between sunset and sunrise only.

D. Trot lines may be used in the following places:

1. Any lake, river, or stream in Indiana except the Wabash, where it forms a common boundary between Indiana and Illinois.
2. Trot lines may not be set within 50 yards of any dam.

Dams and obstructions in streams

- A. It is illegal for anyone to set any commercial fishing devices within 100 feet of any dam in the Wabash River.
- B. No one may place across any stream any obstruction which prevents fish from ascending or descending, other than a dam.

Ice fishing

- A. It is illegal to fish in any lake or river through more than 2 holes in the ice.
- B. No hole used for ice fishing may be more than 2½ feet in diameter.
- C. Only one line may be used in each hole.
- D. Only one single hook may be attached to each line.
- E. Shelter houses, shanties, or fully enclosed structures may be used provided that they meet the following standards:
 1. The name and address of the owner must be clearly indicated on the door.
 2. The structure must be of a temporary nature.
 3. The structure may not be anchored to the bottom of any lake, river, or stream.
 4. Shelters must be removed from the ice before the ice leaves the lake, river, or stream.
 5. The door must have a latch which can be opened from the outside as well as from the inside.

Spear fishing

- A. A fish spear, bow and arrow, or gig may be used **only** for taking such rough fish as suckers, carp, gar, dogfish, buffalo, redhorse, or water dogs, in waters not posted by the Indiana Department of Conservation as trout streams.

Fishing is prohibited in the following areas:

- A. It is illegal to fish or operate a motor boat in fish spawning grounds designated and set aside by the Director of the Indiana Department of Conservation.
- B. No one may fish in any fish hatchery pond.
- C. It is illegal to fish on another person's property without his permission.
- D. Fishing in state parks, forests, or preserves is prohibited unless they are designated as public fishing grounds by the Director of the Indiana Department of Conservation.
- E. It is illegal to take, catch, or kill any frog without a hunting license.

Sale of fish

- A. It is illegal to buy or sell in Indiana any largemouth bass, Kentucky bass, smallmouth bass, silver bass, yellow bass, white bass, striped bass, bluegill, redeared sunfish, crappies, or rock bass, whether taken in this state or taken in some other state and brought into this state.
- B. It is also illegal to sell these fish as part of a meal at any restaurant or hotel.

Commercial fishing

A. Lake Michigan

1. Anyone planning to engage in commercial fishing in Lake Michigan should first obtain a list of regulations from the Director of the Indiana Department of Conservation.
2. Seines, gill-nets, and trap nets may be used in Lake Michigan under a commercial license.

B. Wabash River

1. Regulations should be obtained from the Director of the Indiana Department of Conservation by anyone planning to engage in commercial fishing in the Wabash River.
2. Dip-nets, hoop-nets, or basket nets may be used under a commercial license in certain parts of the Wabash River.
3. All commercial fishing devices used in the Wabash River must be duly licensed and tagged by the Indiana Department of Conservation.

GAME FISH: SEASONS, LIMITS

NOTE: All game species are subject to changes on closed seasons, bag limits, etc., by order of the Director of the Indiana Department of Conservation. For current information, inquire of County Clerks.

Species	Open Season (both dates inclusive)	Bag Limit	Size (inches)
Bluegill (Bream)	June 16 to April 30	25*	5
Red-eared Sunfish	"	25*	5
Crappie (both kinds)	"	25*	5
Rock Bass (goggle-eye)	"	25*	5
Silver or yellow bass	"	6**	10
Smallmouth Black Bass	"	6**	10
Largemouth Black Bass	"	6**	10
Kentucky Bass	"	6**	10
White or Striped Bass	"	6**	10
Pike-perch (Wall-eye)	"	6	10
Pike or Pickerel	"	6	None
Yellow Perch	"	None	None
Brook Trout	May 1 to August 31	15	7
Brown Trout	"	15	7
Loch Leven Trout	"	15	7
Rainbow Trout	"	15	7
Channel Catfish	No Closed Season	None	10
Frogs	April 1 to April 30		
	June 10 to October 30	25	None
Rough fish	No Closed Season	None	None

* Means bag limit of 25 in the aggregate of bluegill, sunfish, crappie, and rock bass combined.

** Means bag limit of 6 in aggregate of all kinds of bass combined.

Possession limit—On fish: two days' lawful catch.

Possession limit—On frogs: 25.

LICENSES—TAGS—STAMPS

Kind	Where Obtained	Fee
Resident hunting, fishing, trapping	County Clerk, Agent, or Director	\$ 2.00
Resident female license to fish only	County Clerk, Agent, or Director	1.00
Nonresident hunting, fishing, trapping	County Clerk, Agent, or Director	15.50
Nonresident yearly fishing	County Clerk, Agent, or Director	3.00
Nonresident fourteen-day fishing	County Clerk, Agent, or Director	2.00
Resident deer	County Clerk or Director	5.00
Trout Stamp	County Clerk, Agent, or Director	1.00
Pheasant Stamps or Tags	Director only	.10
Nonresident Archer's	Director only	2.00
Resident Fur Buyer's	Director only	10.00
Nonresident Fur Buyer's	Director only	25.00
Nonresident Jobber's	Director only	10.00
Lake Michigan Commercial	Director only	
Wabash River	Director only	3.00
Cisco Gill Net	Director only	2.00
Resident Mussel	Director only	2.00
Nonresident Mussel	Director only	15.00
Game Breeder's	Director only	5.00
Taxidermist's	Director only	1.00
Scientific	Director only	1.00
Ferret or Fitch	Director only—for first animal	10.00
	Each additional	5.00
Minnow Dealer	Director only	10.00
Beaver Tag	Director only	2.00
Smelt Net Fishing	Director only	1.00
Pheasant for food sale, importer or dealer (not required by dealer)	Director only	5.00
Pheasant shooting preserves	Director only	100.00

HUNTING REGULATIONS

Licenses

- A. Only the following persons may hunt without a license:
 1. Owners and tenants of Indiana farmlands and their wives and children living with them, only while hunting on their own lands or lands on which they are tenants.
- B. Any other person who hunts, shoots, takes, traps, or pursues wild animals or migratory and upland game birds must have a license on his person.
- C. Non-resident licenses
 1. Any person who is not a resident of Indiana but who plans to hunt or trap within the state must purchase a non-resident hunting license.
 2. Non-resident license holders may carry or transport out of the state the maximum possession allowed of any particular species, with 2 shipments allowed per week.

- D. A hunting or trapping license may be revoked for the violation of Indiana hunting and trapping laws.
- E. Any person who engages in the business of buying untanned fur of fur-bearing animals must have a license to do so.

GAME ANIMALS

General regulations

- A. It is illegal to shoot game animals along, upon, or across any public highway in this state.
- B. Sunday hunting is illegal in Indiana.
- C. Firearms are **not** permitted in any state park property.
- D. It is illegal to hunt or trap on another person's property without his permission.
- E. Hunting is prohibited in state parks, forests, or preserves unless they are designated as public hunting grounds by the Director of the Indiana Department of Conservation.
- F. Hunting appliances and apparatus may be seized and confiscated when they are used in violation of the hunting laws.

Hunting methods and practices

- A. Ferrets and other small animals or any mechanical device used to frighten game are **not** permitted.
 - 1. It is illegal to possess a live fitch or ferret without a license.
- B. Smoking, chopping, or digging fur-bearing animals from their dens is illegal.
- C. No one may possess tree or pole climbers in fields or woods at night, except with special permission, as in the case of public utilities.
- D. No trap may be set closer than 5 feet to the opening of any tile drain 8 inches or larger.
- E. It is illegal to hunt with a silencer.

Rules governing particular species

- A. Rabbits
 - 1. It is illegal to use an artificial light to hunt rabbits.
 - 2. It is illegal to buy, sell, or trade in wild rabbits.
- B. Squirrels
 - 1. It is illegal to sell or buy a grey squirrel.
 - 2. No one may hunt or kill a black squirrel or flying squirrel at any time.
 - 3. Hunting or killing grey squirrels in a public park is prohibited.
- C. Raccoons
 - 1. A hunting day for raccoon is considered to begin at 6:00 P.M. of one day and to end at 6:00 P.M. of the following day.
 - 2. It is illegal to dislodge or attempt to dislodge a raccoon from its den or nest.
- D. Muskrat
 - 1. It is illegal to injure or destroy a muskrat house.

E. Beaver

1. One may only possess the untanned hide of a lawfully taken beaver for 5 days after the last day of the open season unless the hide is properly tagged.
2. No trap may be set for beaver before 12:00 noon on November 15.
3. It is illegal to make or set a trap, deadfall, snare, or net, including stake chain or drag, within 5 feet of the entrance to the house, hole, or den of a beaver.
4. It is illegal to molest or destroy the house, hole, or den of a beaver.

MIGRATORY AND UPLAND GAME BIRDS

Hunting methods and practices

- A. It is illegal to trap birds or to possess a trap to be used for catching birds.
- B. Only one shotgun may be used or possessed while hunting migratory birds.
- C. Regulations or restrictions on hunting migratory birds are made by the Federal government, and it is illegal to shoot, take, or possess them in violation of these restrictions.

Regulations governing particular species:

- A. It is illegal to shoot or kill a bald eagle or golden eagle, or molest its nest or eggs.
- B. All birds are protected by law except English sparrows, starlings, and crows, which are declared pests and may be shot at any time.
- C. Hawks and owls may be killed by landowners or tenants **only** when the birds are in the act of destroying poultry on the land which they own or occupy.

GAME ANIMALS: SEASONS, LIMITS

All game species are subject to changes on closed seasons, bag limits, etc., by order of the Director of the Indiana Department of Conservation. For current information, inquire of County Clerks.

Species	Open Season (Both dates inclusive)	Bag Limit	Possession Limit
Rabbits	November 10 to January 10	5	10
Grey or Fox Squirrels	Season established by Director, Inquire County Clerk		
Deer	Season established by Director, Inquire County Clerk		
Black Squirrel and Flying Squirrel	Unlawful to kill at any time		
Red Fox	Open all year		
Grey Fox	Open all year		
Raccoon	Noon Nov. 15 to Noon Jan. 15	2	
Opossum	"		
Skunk	"		
Mink	"		
Muskrat	"		
Beaver*	"		
Otter	Unlawful to kill at any time		

* Required tag to buy, sell, or possess, \$2.00.

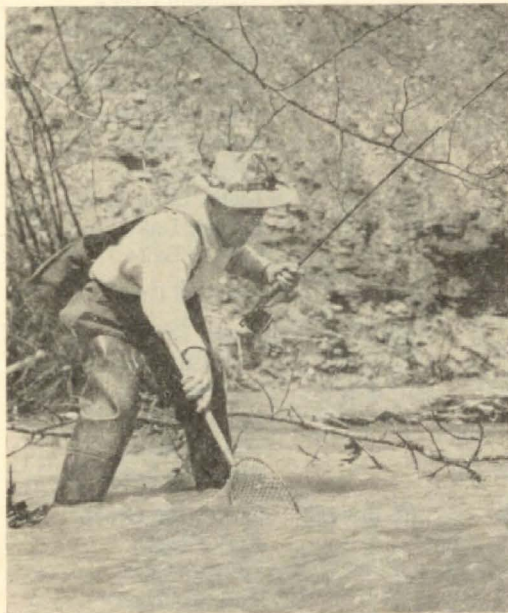

MIGRATORY AND UPLAND GAME BIRDS: SEASONS, LIMITS

NOTE: All game species are subject to changes on closed seasons, bag limits, etc., by order of the Director of the Indiana Department of Conservation. For current information, inquire of County Clerks.

Species	Open Season (Both dates inclusive)	Bag Limit	Possession Limit
Quail	November 10 to December 20	10	30*
Hungarian Partridge	November 10 to December 20	5	10**
Pheasants	Established by Director, Inquire County Clerk Unlawful to kill or have in possession at any time		
Prairie Chicken			
Wild Turkeys			
Ruffed Grouse			
Chukar Partridge			
Doves	Open season and bag limits established by Federal gov- ernment		
Migratory birds, shore birds, and waterfowl			

* Three days lawful hunting.

** Two days lawful hunting.

Facts About Forestry

The Division of Forestry of the Indiana Department of Conservation is organized and operated for the purpose of protecting and conserving the woodland resources of the state of Indiana.

In order best to serve this purpose, the Division administers 14 state forests, containing some 110,000 acres, and 3 state nurseries, which grow and distribute, at cost, approximately 6 million trees and multiflora rose seedlings to private landowners.

These forest lands now contain some 3 times their original value in timber, and earn approximately \$500,000 a year in accumulating growth. Money from timber sales is placed in the Forestry Fund, and provides a source of revenue for the operation of the Division. In addition, 6½ mills of every tax dollar provide funds for purchasing, supervising, and developing a system of state forests.

Careful conservation of Indiana's forests is vital because, in addition to their production of timber and wood products, forests also contribute significantly to soil conservation and rehabilitation, and provide an invaluable aid in water conservation by protecting watersheds and retarding runoff, thus helping to prevent floods and siltation of streams.

Forests provide food and shelter for wildlife, thus aiding sportsmen by helping to build game animal populations. In addition, state forests are declared by the Director to be public hunting grounds for whatever game is in season, so outdoor recreation for the people of the state is provided.

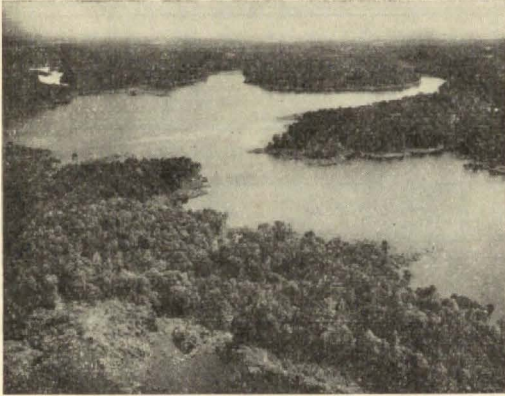

Further recreational opportunities in the state forests include facilities for fishing, boating, hiking and picnicking, as well as bathing in one area at Cagles Mill State Forest.

State forests are also used for scientific purposes, providing areas for research and demonstration of good forestry practices. Forests also contribute importantly to the economic welfare of people in areas of the state where agricultural potentialities are poor.

In addition to the operation of state forests, the Division also maintains an effective organization for fire protection. About 2½ million acres of forest and waste land in Indiana are now under organized protection by the Division of Forestry. This protection is extended to include private, as well as state-owned lands.

26 fire towers, 2 airplane patrols, 32 radio units, 4 District and 22 County Fire Wardens, and 300 volunteer unsalaried wardens are part of the protection organization. The Division also carries on an extensive education program in fire control and prevention, and, as part of this program, trains high school boys in the southern part of the state in fire fighting.

The Division states, however, that, regardless of their efforts and those of the Federal government in abetting the forestry welfare of the state, the determining factor in the success of their program depends upon the attitudes of Indiana's private landowners, who will always own and control about 75% of the land now in trees and the land which should be reforested.
